

SHORT ARTIFICIAL INTELLIGENCE COURSES

2-DAY INTENSIVE WORKSHOPS TRAINING FOR COMPANIES AND
ORGANIZATIONS

04 OCTOBER 2025
ARTIFICIAL INTELLIGENCE INSTITUTE AFRICA
275 CORNER HERBERT CHITEPO & 6TH STREET, HARARE,
ZIMBABWE

Table of Contents

1. Category 1: Generative AI & Large Language Models (LLMs).....	1
1. Course Title: Generative AI for Business Productivity	1
2. Course Title: Building with Large Language Models (LLMs).....	1
3. Course Title: AI-Powered Marketing & Content Creation.....	1
2. Category 2: Data Science & Machine Learning	2
4. Course Title: Practical AI for Data Analysis	2
5. Course Title: AI-Driven Strategic Decision Making	2
3. Category 3: Process Automation & Optimization.....	3
6. Course Title: Intelligent Process Automation with AI	3
7. Course Title: AI for Customer Service Excellence.....	3
4. Category 4: Specialized & Technical Applications.....	4
8. Course Title: Computer Vision for Business	4
9. Course Title: Responsible AI & Governance	4

1. Category 1: Generative AI & Large Language Models (LLMs)

These workshops are in extremely high demand and focus on the practical application of generative technologies.

1. Course Title: Generative AI for Business Productivity

- **Core Focus:** Leveraging tools like ChatGPT, Microsoft Copilot, and Gemini for everyday business tasks.
- **Day 1:** Prompt Engineering Fundamentals, Automating Communication (emails, reports), Research & Summarization, Brainstorming & Ideation.
- **Day 2:** Data Analysis with AI (uploading spreadsheets), Creating Presentations & Drafts, Building Custom GPTs / Copilots for specific roles (e.g., HR, Marketing), Ethics & Security Best Practices.
- **Ideal For:** All employees, from executives to individual contributors.

2. Course Title: Building with Large Language Models (LLMs)

- **Core Focus:** A technical deep dive for developers and tech teams on integrating LLMs via APIs.
- **Day 1:** LLM Architecture Overview (Transformer-based models), Introduction to OpenAI & Anthropic APIs, Advanced Prompt Engineering Techniques, Context Management.
- **Day 2:** Building a Simple AI-Powered Application, Using Frameworks like LangChain, Introduction to RAG (Retrieval-Augmented Generation), Cost and Performance Optimization.
- **Ideal For:** Software Developers, Data Engineers, IT Professionals.

3. Course Title: AI-Powered Marketing & Content Creation

- **Core Focus:** Using generative AI for marketing campaigns, copywriting, and design.
- **Day 1:** AI Copywriting (Ads, Blogs, Social Media), Market Research & Persona Generation with AI, SEO Optimization using AI tools.
- **Day 2:** AI for Visual Content (Midjourney, DALL-E for concept art, storyboards), Creating Video Scripts and Voiceovers, Building a Cohesive AI-Enhanced Content Workflow.
- **Ideal For:** Marketing Teams, Content Creators, Social Media Managers, Brand

2. Category 2: Data Science & Machine Learning

These workshops focus on the core analytical and predictive capabilities of AI.

4. Course Title: Practical AI for Data Analysis

- **Core Focus:** Using no-code/low-code AI tools to gain insights from data, without needing to be a data scientist.
- **Day 1:** Data Preprocessing & Cleaning with AI, Automated Exploratory Data Analysis (EDA), Pattern Recognition and Anomaly Detection.
- **Day 2:** Building Predictive Models with AutoML platforms (e.g., DataRobot, Azure AutoML), Interpreting Model Results, Creating Dashboards and Reports.
- **Ideal For:** Business Analysts, Financial Analysts, Project Managers, Operations Teams.

5. Course Title: AI-Driven Strategic Decision Making

- **Core Focus:** Using AI models for forecasting, risk assessment, and optimizing business strategy.
- **Day 1:** Fundamentals of Predictive & Prescriptive Analytics, Scenario Planning with AI Simulations, Demand Forecasting Models.
- **Day 2:** Risk Analysis and Mitigation Strategies, Supply Chain and Logistics Optimization, Implementing an AI-Augmented Decision Framework.
- **Ideal For:** Executives, Strategy Consultants, Department Heads, Finance & Ops Leaders.

3. Category 3: Process Automation & Optimization

These workshops are about using AI to streamline operations and reduce manual workloads.

6. Course Title: Intelligent Process Automation with AI

- **Core Focus:** Going beyond traditional RPA by incorporating AI for cognitive tasks.
- **Day 1:** Introduction to IPA, Identifying Automation Opportunities, Document Processing with AI (OCR + NLP for invoices, contracts).
- **Day 2:** Building a Workflow with Power Automate/UiPath with AI components, Handling Unstructured Data, Measuring ROI of Automation.
- **Ideal For:** Operations Teams, Finance & Accounting Departments, IT, Process Engineers.

7. Course Title: AI for Customer Service Excellence

- **Core Focus:** Implementing AI to enhance customer support operations.
- **Day 1:** Building and Training AI Chatbots (using platforms like Drift, Intercom), Intent Classification, Automating Tier-1 Support.
- **Day 2:** AI-Powered Sentiment Analysis for tickets and calls, Agent Assist Tools, Designing a Seamless Bot-to-Human Handoff.
- **Ideal For:** Customer Support Managers, CX Teams, Operations Managers.

4. Category 4: Specialized & Technical Applications

These are for teams with specific, advanced technical needs.

8. Course Title: Computer Vision for Business

- **Core Focus:** Applying image and video recognition to solve business problems.
- **Day 1:** Fundamentals of Computer Vision, Use Cases (quality inspection, inventory management, security), Introduction to Pre-trained Models.
- **Day 2:** Building a Custom Image Classifier with No-Code Tools, Video Analytics for Operations, Ethical Considerations in Surveillance.
- **Ideal For:** Manufacturing, Retail, Logistics, Security and Safety Teams.

9. Course Title: Responsible AI & Governance

- **Core Focus:** Ensuring AI systems are fair, explainable, ethical, and compliant.
- **Day 1:** Understanding AI Bias & Fairness, Techniques for Model Explainability (XAI), Regulatory Landscape (e.g., EU AI Act).
- **Day 2:** Implementing an AI Ethics Framework, Creating an AI Governance Checklist, Case Studies of AI Failures and Successes.
- **Ideal For:** Legal & Compliance Teams, Risk Officers, Project Managers, Senior Leadership, AI Developers.
